Career Objective

Computer Science graduate who has built and deployed multiple full-stack applications, including a real-time emergency response platform with role-based access and live incident dispatch and gained practical experience designing REST API, integrating real-time features and optimizing MongoDB queries to improve performance. Eager to bring this hands-on project experience to a Software Developer role and contribute to building reliable, production-ready applications from day one.

Education

Bachelor of Technology (B.Tech), Computer Science Engineering	2022 – 2026
St. Martin's Engineering College (JNTUH), Hyderabad	CGPA: 8.35
Intermediate (TSBIE)	2020 – 2022
Deeksha Junior College, Hyderabad	Percentage: 87.6%
Class X (CBSE)	2019 – 2020
St. Andrews School, Hyderabad	Percentage: 75.2%

Skills

Languages: Python
Frontend: HTML, CSS, JavaScript, React.js
Backend: Flask, Node.js, Express.js
Databases: MongoDB, SQL
Tools: Git, GitHub, Vercel

Projects

ResQNet – Emergency Response System resqnett-five.vercel.app
Node.js, React.js, MongoDB, JWT Auth, REST API

- Built a platform with 4-role role-based access control, JWT authentication, and real-time incident dispatch backed by a Recharts analytics dashboard
- Improved API response time by approximately 35% using MongoDB indexing and geospatial queries, system handles 2,000+ incident records

Logistics Delivery System logistics-delivery-system.vercel.app
Node.js, React.js, Express.js, MongoDB

- Built a scalable logistics and delivery management system with real-time order tracking, warehouse management, and automated delivery assignment
- Implemented order management, driver assignment, and real-time tracking, secured with JWT authentication and role-based access for Admin, Driver, and Customer roles

Freelancer Marketplace

Flask, React.js, MongoDB, JWT Authentication

- Built a full-stack freelancer marketplace with secure authentication, job posting, proposals, contracts, real-time chat, and escrow-based payments
- Designed to support 1,000+ users and 5,000+ transactions; reduced API latency by approximately 40% through query optimization

Achievements

- Solved 100+ Data Structures & Algorithms problems
- Fountane Student Tribe Hackathon Team Lead
- Code Fusion Hackathon – Loyola College Team Lead
